Equivalent fractions chart (up to twelfths)

Name: _____ Date: _____

Every fraction in a row is the same amount. Multiply the top and bottom by the same number to move along a row.

$$1 = \frac{2}{2} = \frac{3}{3} = \frac{4}{4} = \frac{5}{5} = \frac{6}{6} = \frac{8}{8} = \frac{10}{10} = \frac{12}{12}$$

$$\frac{1}{2} = \frac{2}{4} = \frac{3}{6} = \frac{4}{8} = \frac{5}{10} = \frac{6}{12}$$

$$\frac{1}{3} = \frac{2}{6} = \frac{4}{12}$$

$$\frac{2}{3} = \frac{4}{6} = \frac{8}{12}$$

$$\frac{1}{4} = \frac{2}{8} = \frac{3}{12}$$

$$\frac{3}{4} = \frac{6}{8} = \frac{9}{12}$$

$$\frac{1}{5} = \frac{2}{10}$$

$$\frac{2}{5} = \frac{4}{10}$$

$$\frac{3}{5} = \frac{6}{10}$$

$$\frac{4}{5} = \frac{8}{10}$$

$$\frac{1}{6} = \frac{2}{12}$$

$$\frac{5}{6} = \frac{10}{12}$$
